Detail-oriented Software Developer with experience in building scalable backend applications using Python, React.js, Node.js, Flask, Django, and PostgreSQL. Experienced in developing AI-driven simulation platforms, RAG systems, and applying agentic workflows for personalized and intelligent solutions. Skilled in writing clean, efficient, and maintainable code and documentation, while solving real-world problems through full-stack projects. Strong understanding of SDLC, Git, and Agile methodologies, with a focus on delivering scalable, business-oriented, and enterprise-ready solutions.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, FastAPI, Django, MERN Stack (MongoDB, Express.js, React.js, Node.js), Java, JDBC, Spring Boot, Spring MVC, RESTful API, Data Analytics, Pandas, NumPy, Typescript.
- **AI & Machine Learning:** LLMs, RAG (Retrieval-Augmented Generation), LangGraph, Prompt Engineering, Vector Databases, chunking, Embeddings, AI Agents / Agentic Workflows, Generative AI (Gemini / OpenAI / Anthropic), Hugging Face APIs.
- **Databases:** MySQL, PostgreSQL, DynamoDB, MongoDB, H2 Database.
- **Tools & Technologies:** Copilot / Claude, Docker Containerization, AWS, CI/CD (Git and GitHub), DBeaver, Debugging, HTML5, CSS, JavaScript, VS Code, Postman, Figma, Logging, Data Structures & Algorithms.
- **Other Skills:** Agile Methodology, Waterfall Model, Excel, Powerpoint.
- **Soft Skills:** Adaptability, Problem-Solving, Time Management, Communication, Team Collaboration.
- **Concepts:** OOP, Unit Testing, Pytest, SDLC.

WORK EXPERIENCE

EduvanceAI - (Jr Software Developer)

Sep 2025 - Present

- During my experience at Eduvance, I contributed to an AI-based simulation platform, developing intelligent chatbots using RAG and integrating AI solutions for personalized learning. Gained strong exposure to LMS architecture, Autonomous systems and Agentic workflows while enhancing expertise in AWS, Python, AI and Docker for scalable deployments. Collaborated on agentic workflows and LLM-based systems to improve automation and user engagement. Optimizing latency and token cost.
- Technologies used: Python, AI/LLM integrations, AWS (EC2, S3, Amplify, IAM), Docker, Flask, Django, REST APIs, Git.

TNS India Foundation - (Java Developer Trainee)

July 2023 - Jun 2024

- During my internship, I developed a MERN stack billing system for an advocate with PDF generation and file storage features. I also collaborated on a Shopping Mall Management System using Spring Boot, implementing inventory management, cart functionality, and secure transactions.
- Technologies used: React.js, Node.js, Express.js, MongoDB, Spring Boot, JVM, Hibernate, MySQL, H2.

PROJECTS

AI Financial Analyst Agent

Feb 2026 - Mar 2026

- Built a multi-agent AI system to analyze stocks, news, and financial data for actionable insights.
- Used LangGraph to implement planning, reasoning, and iterative decision-making workflows.
- Generated explainable investment insights with structured reasoning and risk evaluation.
- Designed continuous learning loops to refine strategies based on new market data.
- Tech: Python, Flask, LangGraph, LLM APIs, PostgreSQL, Redis, Financial APIs, Docker, AWS, React

CERTIFICATES

Software Engineering and Agile Software Development - Infosys, Data Analytics - IBM, TNS India Foundation (Campus to Technical Careers Training Program), The Complete ReactJs Course - udemy, SolidWorks (3D Modeling) - udemy, AutoCAD (Drafting) - CADD CENTRE

EDUCATION

Vasantdada Patil College of Engg, Mumbai, Maharashtra

Degree in Information Technology (**CGPA: 8.514**) 2022 - 2025

Veermata Jijabai Technological Institute, Mumbai

Diploma in Mechanical Engineering (**87.33%**) 2019 - 2022

Little Star English High School, Mumbai

SSC (**73.40%**) 2018 - 2019

LANGUAGES

- Marathi
- Hindi
- English

LANGUAGES

- 1st Rank – OSCILLATION Hackathon
